

# Quiz 1.1 | Machine Learning History & Applications

Due No due date

Points 7

Questions 7

Time Limit None

## Instructions

The quizzes consists of questions carefully designed to help you self-assess your comprehension of the information presented on the topics covered in the module. Quiz once attempted i.e answered will not be able to attempt the same question again, so please be careful when submitting.

Each question in the quiz is of multiple-choice or "true or false" format. Few maybe having multiple options correct. You will be awarded points accordingly. Each correct or incorrect response will result in appropriate feedback at end when submitted.

## Attempt History

Score for this quiz: **7** out of 7

Submitted Aug 22 at 5:47pm

This attempt took 4 minutes.

### Question 1

1 / 1 pts

1) What is the definition of AI?

☐

In effect, AI is an attempt to initiate human-like common sense and abilities into machines.

☐

AI is a process which comprises of ML and Deep learning

**Correct!**

AI is the process of incorporating human intelligence into machines, so that they can develop the ability to think and respond like humans.

AI is building machines to be able to act like humans.

## Question 2

1 / 1 pts

What is AlphaGo ?

New programming language

Google's AI program that beat human Go player

Initial version of Go language

IBM's Deep Blue program that beat Kasparov in Chess

**Correct!**

## Question 3

1 / 1 pts

Which one is not the type of AI?

Limited memory

Weak AI

ASI

**Correct!**

## Question 4

1 / 1 pts

What is the definition of Machine Learning?

☐

Machine learning is a part of software technology which when programmed gives accurate results

☐

Machine learning helps in building a type of AI which is strong AI

☒

Field of study that gives computers to learn without being explicitly Programmed.

☐

Machine learning is nothing but finding the right type of Model

Correct!

### Question 5

1 / 1 pts

What is Machine Learning ?

☐

Making Robots

☐

Writing Intelligent Algorithms

☒

Making computer programs learn own from data

☐

Doing reasoning

Correct!

### Question 6

1 / 1 pts

Which one of the below options comes under features of AI?

Correct!

- ☐ Can predict natural disasters
- ☐ Imitates human cognition
- ☐ Learns from experience
- ☒ All of the above

### Question 7

1 / 1 pts

Who coined the term AI?

Correct!

- ☒ John McCarthy
- ☐ Herbert Simon
- ☐ Marvin Minsky
- ☐ John Nash

Quiz Score: **7** out of 7
